### SECTION C — CHEMISTRY; METALLURGY

- C09 DYES; PAINTS; POLISHES; NATURAL RESINS; ADHESIVES; COMPOSITIONS NOT OTHERWISE PROVIDED FOR; APPLICATIONS OF MATERIALS NOT OTHERWISE PROVIDED FOR
- C09B ORGANIC DYES OR CLOSELY-RELATED COMPOUNDS FOR PRODUCING DYES; MORDANTS; LAKES (fermentation or enzyme-using processes to synthesise a desired chemical compound C12P)

#### Note(s)

In this subclass, the last place priority rule is applied, i.e. at each hierarchical level, in the absence of an indication to the contrary, a compound is classified in the last appropriate place.

#### Subclass index

ANTHRACENE DYESAZO DYES	1/00, 3/00, 5/00, 6/00, 9/02
Prepared by diazotising and coupling	
Monoazo dyes	29/00
Disazo and polyazo dyes	31/00, 33/00, 35/00
by coupling the diazoted amine with itself	37/00
Other azo dyes	39/00
Special methods of performing the coupling reaction	41/00
Preparation of azo dyes from other azo compounds	43/00
Preparation other than by diazotising and coupling.	
Compounds containing onium groups	44/00
Complex metal compounds	
Compounds containing other chromophoric systems	
Other azo dyes	46/00
INDIGOID; DIARYL AND TRIARYL METHANE; OXYKETONE DYES	7/00, 9/04, 11/00, 13/00
ACRIDINE, AZINE, OXAZINE, THIAZINE DYES	15/00-21/00
QUINOLINE AND POLYMETHINE DYES	23/00, 25/00
HYDRAZONE, TRIAZENE DYES	26/00
PORPHYRINS, PORPHYRAZINS; SULFUR DYES	
QUINACRIDONES	48/00
FORMAZANE DYES; NITRO AND NITROSO DYES; QUINONE IMIDES; AZOMETHINE DYES	50/00, 51/00, 53/00, 55/00
OTHER SYNTHETIC DYES	57/00, 59/00
DYES OF NATURAL ORIGIN	61/00
REACTIVE DYES	62/00
LAKES; MORDANTS; DYESTUFF PREPARATIONS	
OTHER DYES	69/00

#### **Anthracene dyes**

- 1/00 Dyes with an anthracene nucleus not condensed with any other ring [1, 2006.01]
- 1/02 Hydroxy anthraquinones; Ethers or esters thereof [1, 2006.01]
- 1/04 Preparation by synthesis of the nucleus **[1, 2006.01]**
- 1/06 Preparation from starting materials already containing the anthracene nucleus **[1, 2006.01]**
- 1/08 • Dyes containing only OH groups **[1, 2006.01]**
- 1/10 • Dyes containing halogen [1, 2006.01]
- 1/12 • Dyes containing sulfonic acid groups [1, 2006.01]

- 1/14 • Dyes containing ether groups **[1, 2006.01]**
- 1/16 Amino anthraquinones **[1, 2006.01]**
- 1/18 • Preparation by synthesis of the nucleus **[1, 2006.01]**
- 1/20 Preparation from starting materials already containing the anthracene nucleus [1, 2006.01]
- 1/22 • Dyes with unsubstituted amino groups [1, 2006.01]
- 1/24 • sulfonated [1, 2006.01]
- 1/26 • Dyes with amino groups substituted by hydrocarbon radicals [1, 2006.01]
- 1/28 • substituted by alkyl, aralkyl, or cyclo-alkyl groups [1, 2006.01]

1/30	• • • • sulfonated [1, 2006.01]	3/30	<ul> <li>Preparation from starting materials already</li> </ul>
1/32	<ul> <li>• • substituted by aryl groups (anthrimides</li> </ul>		containing the dibenzanthrone or
	C09B 1/48) [1, 2006.01]	2./22	isodibenzanthrone nucleus [1, 2006.01]
1/34	• • • • sulfonated [1, 2006.01]	3/32	• • • by halogenation [1, 2006.01]
1/36	• • • Dyes with acylated amino groups [1, 2006.01]	3/34 3/36	<ul><li>• by oxidation [1, 2006.01]</li><li>• by etherification of hydroxy</li></ul>
1/38	• • • • Urea or thiourea derivatives [1, 2006.01]	3/30	compounds [1, 2006.01]
1/40	• • • the acyl groups being residues of an aliphatic or araliphatic carboxylic acid [1, 2006.01]	3/38	<ul> <li>by introduction of hydrocarbon or acyl residues</li> </ul>
1/42	• • • • the acyl groups being residues of an	0,00	into amino groups <b>[1, 2006.01]</b>
±, .=	aromatic carboxylic acid [1, 2006.01]	3/40	• Pyranthrones [1, 2006.01]
1/43	• • • • Dicarboxylic acids [3, 2006.01]	3/42	<ul> <li>Preparation by synthesis of the</li> </ul>
1/44	<ul> <li>• • • the acyl groups being residues of a</li> </ul>		nucleus [1, 2006.01]
	heterocyclic carboxylic acid [1, 2006.01]	3/44	Preparation from starting materials already  11. 2006 011
1/46	• • • the acyl groups being residues of cyanuric	2/46	containing the pyranthrone nucleus [1, 2006.01]  • • by halogenation [1, 2006.01]
	acid or an analogous heterocyclic compound [1, 2006.01]	3/46 3/48	• • • Amino derivatives [1, 2006.01]
1/467	• • • attached to two or more anthraquinone	3/50	<ul> <li>Dibenzopyrenequinones [1, 2006.01]</li> </ul>
17407	rings [3, 2006.01]	3/52	<ul> <li>Preparation by synthesis of the</li> </ul>
1/473	• • • • the acyl groups being residues of a sulfonic	3,52	nucleus [1, 2006.01]
	acid [3, 2006.01]	3/54	<ul> <li>Preparation from starting materials already</li> </ul>
1/48	• • • Anthrimides [1, 2006.01]		containing the dibenzopyrenequinone
1/50	Amino-hydroxy anthraquinones; Ethers or esters	D./50	nucleus [1, 2006.01]
4 /500	thereof [1, 2006.01]	3/56	• • • Amino derivatives [1, 2006.01]
1/503	<ul> <li>unsubstituted amino-hydroxy anthraquinone [2, 2006.01]</li> </ul>	3/58	• Benzanthraquinones [1, 2006.01]
1/51	N-substituted amino-hydroxy	3/60 3/62	<ul><li>Anthanthrones [1, 2006.01]</li><li>Preparation by synthesis of the</li></ul>
1/31	anthraquinone [2, 2006.01]	3/02	nucleus [1, 2006.01]
1/514	N-aryl derivatives (N-aralkyl derivatives	3/64	Preparation from starting materials already
	C09B 1/515) <b>[2, 2006.01]</b>		containing the anthanthrone nucleus [1, 2006.01]
1/515	<ul> <li>N-alkyl, N-aralkyl, or N-cycloalkyl</li> </ul>	3/66	• • • by halogenation [1, 2006.01]
	derivatives [2, 2006.01]	3/68	• • • Amino derivatives [1, 2006.01]
1/516	• • • N-acylated derivatives [2, 2006.01]	3/70	• Benzo-, naphtho-, or anthra-dianthrones [1, 2006.01]
1/52 1/54	<ul><li>• sulfonated [1, 2006.01]</li><li>• etherified [1, 2006.01]</li></ul>	3/72	Preparation by synthesis of the
1/56	<ul> <li>Mercapto-anthraquinones [1, 2006.01]</li> </ul>	2/74	nucleus [1, 2006.01]
1/58	<ul> <li>with mercapto groups substituted by aliphatic,</li> </ul>	3/74	<ul> <li>Preparation from starting materials already containing the benzo-, naphtho-, or anthra-</li> </ul>
1750	cycloaliphatic, araliphatic or aryl		dianthrone nucleus [1, 2006.01]
	radicals [3, 2006.01]	3/76	• • • by halogenation [1, 2006.01]
1/60	<ul> <li>• substituted by aliphatic, cycloaliphatic or</li> </ul>	3/78	<ul> <li>Other dyes in which the anthracene nucleus is</li> </ul>
	araliphatic radicals [3, 2006.01]		condensed with one or more carbocyclic
1/62	• • with mercapto groups substituted by a heterocyclic	2.400	rings [1, 2006.01]
	ring [3, 2006.01]	3/80	<ul> <li>Preparation by synthesis of the nucleus [1, 2006.01]</li> </ul>
3/00	Dyes with anthracene nucleus condensed with one or	3/82	Preparation from starting materials already
	more carbocyclic rings [1, 2006.01]	3/02	containing the condensed anthracene
3/02	• Benzanthrones [1, 2006.01]		nucleus <b>[1, 2006.01]</b>
3/04	• • Preparation by synthesis of the	<b>5</b> /00	
3/06	nucleus [1, 2006.01]  • Preparation from starting materials already	5/00	Dyes with an anthracene nucleus condensed with one or more heterocyclic rings with or without
3/00	containing the benzanthrone nucleus [1, 2006.01]		carbocyclic rings [1, 2006.01]
3/08	• • • by halogenation [1, 2006.01]	5/02	the heterocyclic ring being condensed in peri
3/10	• • • Amino derivatives [1, 2006.01]		position [1, 2006.01]
3/12	• • Dibenzanthronyls [1, 2006.01]	5/04	• • Pyrazolanthrones [1, 2006.01]
3/14	• Perylene derivatives <b>[1, 2006.01]</b>	5/06	Benzanthronyl-pyrazolanthrone condensation
3/16	<ul> <li>Preparation by synthesis of the</li> </ul>	E /00	products [1, 2006.01]
	nucleus [1, 2006.01]	5/08 5/10	• • • Dipyrazolanthrones [1, 2006.01]
3/18	Preparation from starting materials already  containing the powledge pugleus [1, 2006 01]	5/10	Isothiazolanthrones; Isoxazolanthrones; Isoselenazolanthrones [1, 2006.01]
3/20	containing the perylene nucleus [1, 2006.01]  • • by halogenation [1, 2006.01]	5/12	<ul> <li>Thiophenanthrones [1, 2006.01]</li> </ul>
3/20 3/22	• Dibenzanthrones; Isodibenzanthrones [1, 2006.01]	5/14	Benz-azabenzanthrones
3/24	<ul> <li>Preparation by synthesis of the</li> </ul>		(anthrapyridones) [1, 2006.01]
-/ <b>-</b> ·	nucleus [1, 2006.01]	5/16	• • Benz-diazabenzanthrones, e.g.
3/26	• • • from dibenzanthronyls <b>[1, 2006.01]</b>	=	anthrapyrimidones [1, 2006.01]
3/28	• • • from perylene derivatives [1, 2006.01]	5/18	• • Coeroxene; Coerthiene; Coeramidene; Derivatives
		5/20	thereof [1, 2006.01]  • Flavanthrones [1, 2006.01]

5/22	<ul> <li>Preparation from starting materials already containing the flavanthrone nucleus [1, 2006.01]</li> </ul>	11/16 11/18	<ul> <li>• Preparation from diarylketones or diarylcarbinols [1, 2006.01]</li> <li>• Preparation by oxidation [1, 2006.01]</li> </ul>
5/24	• the heterocyclic ring(s) being condensed with an anthraquinone nucleus in 1-2 or 2-3	11/20	Preparation from other triarylmethane derivatives [1, 2006.01]
	position [1, 2006.01]	11/22	• • • containing —OH groups bound to an aryl
5/26	• • Carbazoles of the anthracene series [1, 2006.01]		nucleus [1, 2006.01]
5/28	• • • Anthrimide carbazoles <b>[1, 2006.01]</b>	11/24	Phthaleins containing amino
5/30	• • 1.2 azoles of the anthracene series [1, 2006.01]		groups <b>[1, 2006.01]</b>
5/32	• • 1.3 azoles of the anthracene series [1, 2006.01]	11/26	• • Triarylmethane dyes in which at least one of the
5/34	Anthraquinone acridones or		aromatic nuclei is heterocyclic [1, 2006.01]
	thioxanthones [1, 2006.01]	11/28	• Pyronines [1, 2006.01]
5/36	• • • Amino acridones <b>[1, 2006.01]</b>	12/00	0 1 1 [1 2000 01]
5/38	<ul> <li>Compounds containing acridone and carbazole</li> </ul>	13/00	Oxyketone dyes [1, 2006.01]
	rings [1, 2006.01]	13/02	• of the naphthalene series, e.g. naphthazarin [1, 2006.01]
5/40	Condensation products of benzanthronyl-amino	13/04	• of the pyrene series [1, 2006.01]
- / /-	anthraquinones [1, 2006.01]	13/04	<ul> <li>of the pyrene series [1, 2006.01]</li> <li>of the acetophenone series [1, 2006.01]</li> </ul>
5/42	• • Pyridino anthraquinones [1, 2006.01]	13/00	of the acetophenone series [1, 2000.01]
5/44	• • Azines of the anthracene series [1, 2006.01]		
5/46	• • • Para-diazines [1, 2006.01]	Acridine.	, azine, oxazine, or thiazine dyes
5/48	• • • • Bis-anthraquinonediazines		•
F /FO	(indanthrone) [1, 2006.01]	15/00	Acridine dyes [1, 2006.01]
5/50	• • • • Preparation by alkaline melting of 2- amino anthraquinones [1, 2006.01]	17/00	Azino duos [1, 2006 01]
5/52	• • • • • Preparation by condensation of 1.2-	<b>17/00</b> 17/02	Azine dyes [1, 2006.01]
3/32	halogeno-amino		• of the benzene series [1, 2006.01]
	anthraquinones [1, 2006.01]	17/04	• of the naphthalene series [1, 2006.01]
5/54	• • • • Preparation from 2-amino	17/06	• Fluorindine or its derivatives [1, 2006.01]
	anthrahydroquinones [1, 2006.01]	19/00	Oxazine dyes [1, 2006.01]
5/56	• • • • • Preparation from starting materials	19/02	Bisoxazines prepared from amino
	already containing the indanthrene nucleus [1, 2006.01]		quinones [1, 2006.01]
5/58	• • • • • by halogenation [1, 2006.01]	21/00	Thiazine dyes [1, 2006.01]
5/60	• • • Thiazines; Oxazines [1, 2006.01]		
5/62	<ul> <li>Cyclic imides or amidines of peri-dicarboxylic acids</li> </ul>	0 1 11	1 4: 1
	of the anthracene, benzanthrene, or perylene	Quinoiine	e or polymethine dyes
	series [1, 2006.01]	23/00	Methine or polymethine dyes, e.g. cyanine
<i>C</i> /00	Anthropono diver not provided for above [2, 2006 01]		dyes [1, 2006.01]
6/00	Anthracene dyes not provided for above [2, 2006.01]		
7/00		23/01	<ul> <li>characterised by the methine chain [3, 2006.01]</li> </ul>
	Indigoid dyes [1, 2006.01]	23/01 23/02	<ul> <li>characterised by the methine chain [3, 2006.01]</li> <li>containing an odd number of &gt;CH</li> </ul>
	<ul><li>Indigoid dyes [1, 2006.01]</li><li>Bis-indole indigos [1, 2006.01]</li></ul>		-
7/02	• Bis-indole indigos [1, 2006.01]		• • containing an odd number of CH
	<ul><li>Bis-indole indigos [1, 2006.01]</li><li>Halogenation thereof [1, 2006.01]</li></ul>	23/02 23/04	• • containing an odd number of CH groups [1, 3, 2006.01]

COATING COMPOSITIONS, e.g. PAINTS, VARNISHES OR LACQUERS; FILLING PASTES; CHEMICAL PAINT OR INK REMOVERS; INKS; CORRECTING FLUIDS; WOODSTAINS; PASTES OR SOLIDS FOR COLOURING OR PRINTING; USE OF MATERIALS THEREFOR (cosmetics A61K; processes for applying liquids or other fluent materials to surfaces, in general, B05D; staining wood B27K 5/02; glazes or vitreous enamels C03C; natural resins, French polish, driers, turpentine, per se, C09F; polishing compositions other than French polish, ski waxes C09G; adhesives or use of materials as adhesives C09J; materials for sealing or packing joints or covers C09K 3/10; materials for stopping leaks C09K 3/12; processes for the electrolytic or electrophoretic production of coatings C25D) [5]

#### Note(s) [5]

- 1. In this subclass, the following terms or expressions are used with the meanings indicated:
  - ullet "use of materials for coating compositions" means the use of known or new polymers or products;
  - "rubber" includes:
    - a. natural or conjugated diene rubbers;
    - b. rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, <u>see</u> the group provided for coating compositions based on such macromolecular compounds);
  - "based on" is defined by means of Note (3), below;
  - "filling pastes" means materials used to fill up the holes or cavities of a substrate in order to smooth its surface prior to coating.
- 2. In this subclass, coating compositions, containing specific organic macromolecular substances are classified only according to the macromolecular substance, non-macromolecular substances not being taken into account.

Example: a coating composition containing polyethene and amino-propyltrimethoxysilane is classified in group C09D 123/06. However, coating compositions containing combinations of organic non-macromolecular compounds having at least one polymerisable carbon-to-carbon unsaturated bond with prepolymers or polymers other than unsaturated polymers of groups C09D 159/00-C09D 187/00 are classified according to the unsaturated non-macromolecular component in group C09D 4/00.

Example: a coating composition containing polyethene and styrene monomer is classified in group C09D 4/00.

- Aspects relating to the physical nature of the coating compositions or to the effects produced, as defined in group C09D 5/00, if clearly and explicitly stated, are also classified in this subclass.
- Coating compositions characterised by other features, e.g. additives, are classified in group C09D 7/00, unless the macromolecular constituent is specified.
- In this subclass, coating compositions comprising two or more macromolecular constituents are classified according to the macromolecular constituent or constituents present in the highest proportion, i.e. the constituent on which the composition is based. If the composition is based on two or more constituents, present in equal proportions, the composition is classified according to each of these
  - Example: a coating composition containing 80 parts of polyethene and 20 parts of polyvinylchloride is classified in group C09D 123/06. A coating composition containing 40 parts of polyethene and 40 parts of polyvinylchloride is classified in groups C09D 123/06 and C09D 127/06.

3/02	• Purification of solutions of gelatine [1, 2006.01]		

## ADHESIVES; NON-MECHANICAL ASPECTS OF ADHESIVE PROCESSES IN GENERAL; ADHESIVE PROCESSES NOT PROVIDED FOR ELSEWHERE; USE OF MATERIALS AS ADHESIVES (preparation of glue or gelatine C09H) [5]

### Note(s) [5]

- 1. In this subclass, the following terms or expressions are used with the meanings indicated:
  - "use of materials as adhesives" means the use of known or new polymers or products;

- "rubber" includes:
  - natural or conjugated diene rubbers;
  - rubber in general (for a specific rubber, other than a natural rubber or a conjugated diene rubber, see the group provided for adhesives based on such macromolecular compounds);
- "based on" is defined by means of Note (3), below.

• • Paper; Textile fabrics [2018.01]

• • Plastics; Metallised plastics [2018.01]

7/21

7/22

In this subclass, adhesives containing specific organic macromolecular substances are classified only according to the macromolecular substance, non-macromolecular substances not being taken into account.

Example: an adhesive containing polyethene and amino-propyltrimethoxysilane is classified in group C09J 123/06.

However, adhesives containing combinations of organic non-macromolecular compounds having at least one polymerisable carbon-tocarbon unsaturated bond with prepolymers or polymers other than unsaturated polymers of groups C09J 159/00-C09J 187/00 are classified according to the unsaturated non-macromolecular component in group C09J 4/06.

Example: an adhesive containing polyethene and styrene monomer is classified in group C09J 4/06.

Aspects relating to the physical nature of the adhesives or to the effects produced, as defined in group C09J 9/00, if clearly and explicitly stated, are also classified in this subclass.

Adhesives characterised by other features, e.g. additives, are classified in group C09J 11/00, unless the macromolecular constituent is specified.

In this subclass, adhesives comprising two or more macromolecular constituents are classified according to the macromolecular constituent or constituents present in the highest proportion, i.e. the constituent on which the adhesive is based. If the adhesive is based on two or more constituents, present in equal proportions, the adhesive is classified according to each of these constituents. Example: an adhesive containing 80 parts of polyethene and 20 parts of polyvinylchloride is classified in group C09J 123/06. An adhesive containing 40 parts of polyethene and 40 parts of polyvinylchloride is classified in groups C09J 123/06 and C09J 127/06.

#### Adhesives based on polysaccharides or on their derivatives [5]

#### Note(s) [2006.01]

- 1. In groups C09J 101/00-C09J 201/00, any macromolecular constituent of an adhesive composition which is not identified by the classification according to Note (3) after the title of subclass C09J, and the use of which is determined to be novel and non-obvious, must also be classified in a group chosen from groups C09J 101/00-C09J 201/00.
- 2. Any macromolecular constituent of an adhesive composition which is not identified by the classification according to Note (3) after the title of subclass C09J or Note (1) above, and which is considered to represent information of interest for search, may also be classified in a group chosen from groups C09J 101/00-C09J 201/00. This can, for example, be the case when it is considered of interest to enable searching of adhesive compositions using a combination of classification symbols. Such non-obligatory classification should be given as "additional information".

## 101/00 Adhesives based on cellulose, modified cellulose, or cellulose derivatives [5, 2006.01]

- 101/02 Cellulose; Modified cellulose **[5, 2006.01]**
- 101/04 • Oxycellulose; Hydrocellulose **[5, 2006.01]**
- 101/06 • Cellulose hydrate **[5, 2006.01]**
- 101/08 Cellulose derivatives **[5, 2006.01]**
- 101/10 Esters of organic acids (of both organic acids and inorganic acids C09J 101/20) [5, 2006.01]
- 101/12 • Cellulose acetate **[5, 2006.01]**
- 101/14 • Mixed esters, e.g. cellulose acetatebutyrate **[5, 2006.01]**
- Esters of inorganic acids (of both organic acids and inorganic acids C09J 101/20) [5, 2006.01]
- 101/18 • Cellulose nitrate **[5, 2006.01]**
- 101/20 Esters of both organic acids and inorganic acids [5, 2006.01]
- 101/22 • Cellulose xanthate **[5, 2006.01]**
- 101/24 • Viscose **[5, 2006.01]**
- 101/26 • Cellulose ethers **[5, 2006.01]**
- 101/28 • Alkyl ethers **[5, 2006.01]**
- 101/30 • Aryl ethers; Aralkyl ethers [5, 2006.01]
- 101/32 • Cellulose ether-esters **[5, 2006.01]**

# 103/00 Adhesives based on starch, amylose or amylopectin or on their derivatives or degradation products [5, 2006.01]

- 103/02 Starch; Degradation products thereof, e.g. dextrin **[5, 2006.01]**
- 103/04 Starch derivatives [5, 2006.01]
- 103/06 • Esters [5, 2006.01]
- 103/08 • Ethers [5, 2006.01]
- 103/10 • Oxidised starch **[5, 2006.01]**
- 103/12 Amylose; Amylopectin; Degradation products thereof [5, 2006.01]
- 103/14 Amylose derivatives; Amylopectin derivatives [5, 2006.01]
- 103/16 • Esters **[5, 2006.01]**
- 103/18 • Ethers [5, 2006.01]
- 103/20 • Oxidised amylose; Oxidised amylopectin **[5, 2006.01]**

- 105/00 Adhesives based on polysaccharides or on their derivatives, not provided for in groups C09J 101/00 or C09J 103/00 [5, 2006.01]
- 105/02 Dextran; Derivatives thereof **[5, 2006.01]**
- Alginic acid; Derivatives thereof [5, 2006.01]
- 105/06 Pectin; Derivatives thereof **[5, 2006.01]**
- 105/08 Chitin; Chondroitin sulfate; Hyaluronic acid; Derivatives thereof [5, 2006.01]
- 105/10 Heparin; Derivatives thereof **[5, 2006.01]**
- 105/12 Agar-agar; Derivatives thereof **[5, 2006.01]**
- Hemicellulose; Derivatives thereof [5, 2006.01]
- Cyclodextrin; Derivatives thereof [5, 2006.01]

#### Adhesives based on rubbers or on their derivatives [5]

- 107/00 Adhesives based on natural rubber [5, 2006.01]
- 107/02 Latex **[5, 2006.01]**
- 109/00 Adhesives based on homopolymers or copolymers of conjugated diene hydrocarbons [5, 2006.01]
- 109/02 Copolymers with acrylonitrile **[5, 2006.01]**
- 109/04 Latex [5, 2006.01]
- 109/06 Copolymers with styrene **[5, 2006.01]**
- 109/08 • Latex **[5, 2006.01]**
- 109/10 Latex (C09J 109/04, C09J 109/08 take precedence) [5, 2006.01]
- 111/00 Adhesives based on homopolymers or copolymers of chloroprene [5, 2006.01]
- 111/02 Latex **[5, 2006.01]**
- 113/00 Adhesives based on rubbers containing carboxyl groups [5, 2006.01]
- 113/02 Latex **[5, 2006.01]**
- **Adhesives based on rubber derivatives** (C09J 111/00, C09J 113/00 take precedence) **[5, 2006.01]**
- Rubber derivatives containing halogen [5, 2006.01]
- 117/00 Adhesives based on reclaimed rubber [5, 2006.01]
- 119/00 Adhesives based on rubbers, not provided for in groups C09J 107/00-C09J 117/00 [5, 2006.01]
- 119/02 Latex **[5, 2006.01]**
- 121/00 Adhesives based on unspecified rubbers [5, 2006.01]
- 121/02 Latex **[5, 2006.01]**

# Adhesives based on organic macromolecular compounds obtained by reactions only involving carbon-to-carbon unsaturated bonds [5]

#### Note(s) [1, 2006.01]

- 1. In groups C09J 123/00-C09J 149/00, "aliphatic radical" means an acyclic or a non-aromatic carbocyclic carbon skeleton which is considered to be terminated by every bond to:
  - a. an element other than carbon;
  - b. a carbon atom having a double bond to one atom other than carbon;
  - c. an aromatic carbocyclic ring or a heterocyclic ring.
- In groups C09J 123/00-C09J 149/00, in the absence of an indication to the contrary, a copolymer is classified according to the major monomeric component.

123/00	Adhesives based on homopolymers or copolymers of unsaturated aliphatic hydrocarbons having only one	127/06	<ul> <li>Homopolymers or copolymers of vinyl chloride [5, 2006.01]</li> </ul>
	carbon-to-carbon double bond; Adhesives based on derivatives of such polymers [5, 2006.01]	127/08	<ul> <li>Homopolymers or copolymers of vinylidene chloride [5, 2006.01]</li> </ul>
123/02	<ul> <li>not modified by chemical after-treatment [5, 2006.01]</li> </ul>	127/10	• • containing bromine or iodine atoms [5, 2006.01]

	acids C09J 131/00; based on polymers of cyclic	151/02	• grafted on to polysaccharides [5, 2006.01]
	anhydrides of unsaturated acids C09J 135/00);	151/04	• grafted on to rubbers [5, 2006.01]
	Adhesives based on derivatives of such	151/04	<ul> <li>grafted on to homopolymers or copolymers of</li> </ul>
	polymers [5, 2006.01]	131/00	aliphatic hydrocarbons containing only one carbon-
			to-carbon double bond [5, 2006.01]
139/00	Adhesives based on homopolymers or copolymers of	151/08	grafted on to macromolecular compounds obtained
	compounds having one or more unsaturated	131/00	otherwise than by reactions only involving carbon-to-
	aliphatic radicals, each having only one carbon-to-		carbon unsaturated bonds [5, 2006.01]
	carbon double bond, and at least one being	151/10	• grafted on to inorganic materials [5, 2006.01]
	terminated by a single or double bond to nitrogen or	131/10	graned on to morganic materials [3, 2000.01]
	by a heterocyclic ring containing nitrogen; Adhesives	153/00	Adhesives based on block copolymers containing at
400/00	based on derivatives of such polymers [5, 2006.01]	200700	least one sequence of a polymer obtained by
139/02	Homopolymers or copolymers of		reactions only involving carbon-to-carbon
40075	vinylamine [5, 2006.01]		unsaturated bonds; Adhesives based on derivatives
139/04	Homopolymers or copolymers of monomers		of such polymers [5, 2006.01]
	containing heterocyclic rings having nitrogen as ring		
	member [5, 2006.01]		

153/02	<ul> <li>Vinyl aromatic monomers and conjugated dienes [5, 2006.01]</li> </ul>	161/34	Condensation polymers of aldehydes or ketones with monomers covered by at least two of the groups  COLLIGIO COLLIGIOS and  COLLIGIOS COLLIGIO
155/00	Adhesives based on homopolymers or copolymers,		C09J 161/04, C09J 161/18 and C09J 161/20 <b>[5, 2006.01]</b>
	obtained by polymerisation reactions only involving carbon-to-carbon unsaturated bonds, not provided for in groups C09J 123/00-C09J 153/00 [5, 2006.01]	163/00	Adhesives based on epoxy resins; Adhesives based on derivatives of epoxy resins [5, 2006.01]
155/02	ABS [Acrylonitrile-Butadiene-Styrene]	163/02	• Polyglycidyl ethers of bis-phenols [5, 2006.01]
100702	polymers <b>[5, 2006.01]</b>	163/04	<ul> <li>Epoxynovolacs [5, 2006.01]</li> </ul>
155/04	<ul> <li>Polyadducts obtained by the diene</li> </ul>	163/06	Triglycidylisocyanurates [5, 2006.01]
	synthesis <b>[5, 2006.01]</b>	163/08	• Epoxidised polymerised polyenes [5, 2006.01]
157/00	Adhesives based on unspecified polymers obtained by reactions only involving carbon-to-carbon unsaturated bonds [5, 2006.01]	163/10	• Epoxy resins modified by unsaturated compounds [5, 2006.01]
157/02	• Copolymers of mineral oil hydrocarbons [5, 2006.01]		<u>Note(s) [5]</u>
157/04	Copolymers in which only the monomer in minority		In groups C09J 165/00-C09J 185/00, in the absence of
10,70.	is defined <b>[5, 2006.01]</b>		an indication to the contrary, adhesives based on macromolecular compounds obtained by reactions
157/06	<ul> <li>Homopolymers or copolymers containing elements other than carbon and hydrogen [5, 2006.01]</li> </ul>		forming two different linkages in the main chain are classified only according to the linkage present in
157/08	• containing halogen atoms [5, 2006.01]		excess.
157/10	<ul> <li>containing oxygen atoms [5, 2006.01]</li> </ul>	405 (00	
157/12	• • containing nitrogen atoms [5, 2006.01]	165/00	Adhesives based on macromolecular compounds obtained by reactions forming a carbon-to-carbon link in the main chain (C09J 107/00-C09J 157/00,
Adhesive	s based on organic macromolecular compounds		C09J 161/00 take precedence); Adhesives based on
	otherwise than by reactions only involving carbon-to-		derivatives of such polymers [5, 2006.01]
<u>carbon u</u>	nsaturated bonds [5]	165/02	• Polyphenylenes [5, 2006.01]
150/00	Adhesiyas based on polyasetals. Adhesiyas based on	165/04	• Polyxylylenes <b>[5, 2006.01]</b>
159/00	Adhesives based on polyacetals; Adhesives based on derivatives of polyacetals [5, 2006.01]	167/00	Adhesives based on polyesters obtained by reactions
159/02	<ul> <li>Polyacetals containing polyoxymethylene sequences only [5, 2006.01]</li> </ul>	107700	forming a carboxylic ester link in the main chain (based on polyester-amides C09J 177/12; based on
159/04	• Copolyoxymethylenes [5, 2006.01]		polyester-imides C09J 179/08); Adhesives based on derivatives of such polymers [5, 2006.01]
161/00	Adhesives based on condensation polymers of aldehydes or ketones (with polyalcohols C09J 159/00; with polynitriles C09J 177/00); Adhesives based on	167/02	<ul> <li>Polyesters derived from dicarboxylic acids and dihydroxy compounds (C09J 167/06 takes precedence) [5, 2006.01]</li> </ul>
	derivatives of such polymers [5, 2006.01]	167/03	• • the dicarboxylic acids and dihydroxy compounds
161/02	<ul> <li>Condensation polymers of aldehydes or ketones only [5, 2006.01]</li> </ul>		having the hydroxy and the carboxyl groups directly linked to aromatic rings <b>[5, 2006.01]</b>
161/04	<ul> <li>Condensation polymers of aldehydes or ketones with phenols only [5, 2006.01]</li> </ul>	167/04	Polyesters derived from hydroxy carboxylic acids, e.g. lactones (C09J 167/06 takes
161/06	• • of aldehydes with phenols [5, 2006.01]	167/06	<ul><li>precedence) [5, 2006.01]</li><li>Unsaturated polyesters having carbon-to-carbon</li></ul>
161/08	• • • with monohydric phenols [5, 2006.01]	107700	unsaturation [5, 2006.01]
161/10	• • • Phenol-formaldehyde condensates [5, 2006.01]	167/07	• having terminal carbon-to-carbon unsaturated bonds [5, 2006.01]
161/12	• • • with polyhydric phenols [5, 2006.01]	167/08	<ul> <li>Polyesters modified with higher fatty oils or their</li> </ul>
161/14	• • Modified phenol-aldehyde condensates [5, 2006.01]		acids, or with natural resins or resin
161/16	• • of ketones with phenols [5, 2006.01]		acids <b>[5, 2006.01]</b>
161/18	Condensation polymers of aldehydes or ketones with	169/00	Adhesives based on polycarbonates; Adhesives based
	aromatic hydrocarbons or their halogen derivatives only <b>[5, 2006.01]</b>	105/00	on derivatives of polycarbonates [5, 2006.01]
161/20	<ul> <li>Condensation polymers of aldehydes or ketones with</li> </ul>	171/00	Adhesives based on polyethers obtained by reactions
	only compounds containing hydrogen attached to		forming an ether link in the main chain (based on
	nitrogen (with amino phenols		polyacetals C09J 159/00; based on epoxy resins
161/22	C09J 161/04) <b>[5, 2006.01]</b> • of aldehydes with acyclic or carbocyclic		C09J 163/00; based on polythioether-ethers C09J 181/02; based on polyethersulfones C09J 181/06);
	compounds [5, 2006.01]		Adhesives based on derivatives of such polymers [5, 2006.01]
161/24 161/26	<ul><li>• with urea or thiourea [5, 2006.01]</li><li>• of aldehydes with heterocyclic</li></ul>	171/02	<ul> <li>Polyalkylene oxides [5, 2006.01]</li> </ul>
101/20	compounds [5, 2006.01]	171/03	<ul> <li>Polyepihalohydrins [5, 2006.01]</li> </ul>
161/28	• • • with melamine [5, 2006.01]	171/08	<ul> <li>Polyethers derived from hydroxy compounds or from</li> </ul>
161/30	of aldehydes with heterocyclic and acyclic or carbocyclic compounds [5, 2006.01]		their metallic derivatives (C09J 171/02 takes precedence) <b>[5, 2006.01]</b>

#### MATERIALS FOR APPLICATIONS NOT OTHERWISE PROVIDED FOR; APPLICATIONS OF MATERIALS NOT **C09K** OTHERWISE PROVIDED FOR

#### Note(s) [4]

- This subclass <u>covers</u> also the use of specified materials in general or their use for the applications not specifically provided for elsewhere.
- In this subclass, the following term is used with the meaning indicated:
   "materials" includes compositions.

3/00	Materials not provided for elsewhere [1, 2, 2006.01]	5/18	• • Non-reversible chemical reactions [7, 2006.01]
3/10	<ul> <li>for sealing or packing joints or covers [1, 2006.01]</li> </ul>	5/20	<ul> <li>Antifreeze additives therefor, e.g. for radiator</li> </ul>
3/12	<ul> <li>for stopping leaks, e.g. in radiators or in tanks [1, 2006.01]</li> </ul>		liquids [7, 2006.01]
3/14	• Anti-slip materials; Abrasives <b>[1, 4, 2006.01]</b>	8/00	Compositions for drilling of boreholes or wells;
3/16	• Anti-static materials [1, 4, 2006.01]		Compositions for treating boreholes or wells, e.g. for
3/18	for application to surface to minimize adherence of	0.700	completion or for remedial operations [2006.01]
	ice, mist or water thereto; Thawing or antifreeze	8/02	• Well-drilling compositions [2006.01]
	materials for application to surfaces [1, 4, 2006.01]		Note(s) [2006.01]
3/20	<ul> <li>as substitutes for glycerol in its non-chemical uses,</li> </ul>		In groups C09K 8/03-C09K 8/38, the last place priority
	e.g. as a base in toiletry creams or		rule is applied, i.e. at each hierarchical level, in the
2/22	ointments [1, 2006.01]		absence of an indication to the contrary, classification is
3/22 3/24	• for dust-laying or dust-absorbing [1, 4, 2006.01]		made in the last appropriate place.
3/30	<ul> <li>for simulating ice or snow [1, 4, 2006.01]</li> <li>for aerosols [1, 4, 2006.01]</li> </ul>	8/03	Specific additives for general use in well-drilling
3/30	• for treating liquid pollutants, e.g. oil, gasoline or fat	0./025	compositions [2006.01]
3/32	(processes for making harmful chemical substances	8/035	• • • Organic additives [2006.01]
	harmless or less harmful, by effecting a chemical	8/04	• • Aqueous well-drilling compositions [2006.01]
	change in the substances A62D 3/00) [1, 2006.01]	8/05	<ul> <li>containing inorganic compounds only, e.g. mixtures of clay and salt [2006.01]</li> </ul>
5/00	Heat-transfer, heat-exchange or heat-storage	8/06	<ul> <li>Clay-free compositions (containing inorganic</li> </ul>
	materials, e.g. refrigerants; Materials for the		compounds only C09K 8/05) [2006.01]
	production of heat or cold by chemical reactions	8/08	• • • containing natural organic compounds, e.g.
	other than by combustion [2, 2006.01]		polysaccharides, or derivatives thereof [2006.01]
5/02	• Materials undergoing a change of physical state when	8/10	• • • • Cellulose or derivatives thereof [2006.01]
	used (C09K 5/16, C09K 5/20 take precedence) <b>[2, 2006.01]</b>	8/12	• • • containing synthetic organic macromolecular
5/04	the change of state being from liquid to vapour or	0/12	compounds or their precursors [2006.01]
5/04	vice-versa [2, 2006.01]	8/14	Clay-containing compositions (containing)
5/06	the change of state being from liquid to solid or		inorganic compounds only
	<u>vice-versa</u> [2, 2006.01]		C09K 8/05) [ <b>2006.01</b> ]
5/08	<ul> <li>Materials not undergoing a change of physical state</li> </ul>	8/16	• • • characterised by the inorganic compounds
	when used (C09K 5/16, C09K 5/20 take	0.440	other than clay [2006.01]
	precedence) [7, 2006.01]	8/18	• • • characterised by the organic compounds [2006.01]
5/10	• • Liquid materials [7, 2006.01]	8/20	• • • • Natural organic compounds or derivatives
5/12	<ul> <li>• Molten materials, i.e. materials solid at room temperature, e.g. metals or salts [7, 2006.01]</li> </ul>	0/20	thereof, e.g. polysaccharides or lignin
5/14	<ul> <li>Solid materials, e.g. powdery or</li> </ul>		derivatives [2006.01]
J/ 1 <del>4</del>	granular [7, 2006.01]	8/22	• • • • • Synthetic organic compounds [2006.01]
5/16	Materials undergoing chemical reactions when	8/24	• • • • • Polymers [2006.01]
2.10	used [7, 2006.01]	8/26	• • • Oil-in-water emulsions [2006.01]
